Extended Learning Program
Handbook

Salt Lake City School District

Mission Statement
Salt Lake City School District advocates for all students, provides the highest quality education and prepares students for a future of opportunities.

Vision
Excellence and equity: every student, every classroom, every day.

Extended Learning Program

ELP Mission Statement
The Extended Learning Program supports the mission of Salt Lake City School District (SLCSD) to cultivate a love of learning in a diverse and inclusive school community, committed to education excellence and integrity. In collaboration with families and community, we hold high expectations for all students, respond effectively to individual needs, and provide a safe, healthy environment in which every student can learn the academic, problem-solving and social skills required for success in college, career, and life. The district has designed and implemented an Extended Learning Program to meet the cognitive and affective needs of identified gifted students. Through ELP, a continuum of program options provides a beneficial learning environment and curriculum designed to meet the needs of gifted/talented and high ability students.

ELP Motto
Discovering Through Depth and Complexity

Extended Learning Program Policies and Procedures

Utah Administrative Rule R277-707 Enhancement for Accelerated Students: LEA’s (Local Education Associations) are provided resources to enhance the academic growth of students whose academic achievement is accelerated. Accelerated students means students participating in accelerated programs...with increased depth, complexity, or rigor, which may include above-grade level coursework, including: Gifted and Talented programs. Gifted and Talented programs identify students with outstanding abilities in general intellectual ability, specific academic aptitude, and creative or productive thinking. These instruments shall not be solely dependent upon English vocabulary or comprehension skills and shall take into consideration abilities of culturally diverse students and students with disabilities, including underrepresented students.

Salt Lake City School District Standard Educational Program Policy:
The Extended Learning Program (ELP) is a designated component of the Standard Educational Program Policy, as adopted by the SLCSD Board of Education.

Salt Lake City School District Board of Education Policy, including ELP:
The Salt Lake City School District Board of Education will ensure all students regardless of which school they attend, have access to a quality education based on common standards that lead to proficient levels of achievement for all students. The district is committed to providing students with equal access and equal opportunity, and therefore does not discriminate on the basis of age, color, disability, gender, gender identity, genetic information, national origin, pregnancy, race, religion, sexual orientation or veteran status in its programs or services.

Administration and Staff
The SLCSD ELP Department is administered by the District ELP Supervisor who has direct supervisory responsibility for the elementary NELP teachers and programs.

The SLCSD ELP Department has the following employees who work under the direction of the district ELP Supervisor: ELP Administrative Assistant, ELP Psychologist and ELP Specialist.

Definition and Characteristics of Gifted Students
An academically gifted student is a student with outstanding ability, typically documented by cognitive assessment scores above the 95th percentile. This student may also be one who shows the potential for performing at remarkably high levels of accomplishment when compared with others of a similar age, experience, and educational environment. Gifted and high ability students exhibit high performance capability in intellectual areas and may excel in specific academics; these students require advanced services that cannot be provided in the general education classroom.

Adapted and modified from National Excellence: The Case for Developing America’s Talent, 1993
Overview: Extended Learning Program (ELP)
Salt Lake City School District Extended Learning Program services are provided to meet the needs of identified gifted/talented and high ability students. ELP services offer students the opportunity to engage in learning with greater depth, complexity, and rigor, through differentiated curriculum and instruction. Depth involves understanding a topic beyond surface knowledge, and encourages students to venture further, deeper, with greater elaboration. It involves learning from concrete to abstract, familiar to unfamiliar, known to unknown, and literal to symbolized. Complexity involves understanding a topic with more abstract thinking. Complexity helps students make connections and identify relationships and associations between, within, and across subjects and disciplines. It focuses on varying perspectives, issues, problems, and themes, and conceptual learning. Certified teachers with a Gifted and Talented Endorsement teach ELP classes.

The Extended Learning Program serves gifted/talented and high ability students in elementary and middle schools with two service models.

Elementary school Magnet Extended Learning Program (MELP) is a full day program at three elementary schools, Emerson (Spanish Dual Language Immersion), Hawthorne, and Whittier. The Neighborhood Extended Learning Program (NELP) is a pull-out program that serves students in grades 4-6 in all SLCSD neighborhood elementary schools.

Middle school Magnet Extended Learning Program (MELP) serves students in grades 7 and 8 in four core subjects. The Neighborhood Extended Learning Program (NELP) serves students in two or more core subjects.

Eligibility for placement in the elementary or middle school ELP program is determined through a district process that includes nationally normed assessment measures. ELP concludes after grade 8.

High schools offer a variety of self-selected classes and programs, including Advanced Placement and the International Baccalaureate Program.

2018-2022 Five-Year Plan
The 2018-2022 Five-Year Plan for the Extended Learning Program will allow us to continue to move toward greater diversity within the ELP programs. This plan gives us an opportunity to provide more access to all students through new screening and testing options. Our ELP educators have an opportunity to develop culturally responsive frameworks and teaching strategies to validate students with specific and unique needs. Six areas of focus will guide our work in ELP:

- Student Identification and Assessment
- Social and Emotional Support in ELP
• Rigorous and Cohesive Academic Programs
• High Quality Teaching and Professional Development
• Communication
• Program Design

These areas of focus follow the six standards outlined by the National Association for Gifted Children (NAGC). “The Pre-K-Grade 12 Gifted Education Programming Standards were developed with input from a variety of stakeholders. The standards increase the focus on diversity and collaboration – two powerful principles that guide high quality programs and services. The standards use student outcomes for goals, rather than teacher practices, keeping them in line with the thinking in education standards generally. Because these standards are grounded in theory, research, and practice paradigms, they provide an important base for all efforts on behalf of gifted learners at all stages of development.

The Five-Year Plan can be accessed on the Extended Learning Program website.

**Magnet Extended Learning Program, grades K-6**

**Elementary Magnet ELP**
The Elementary Magnet Extended Learning Program is a full day program for identified gifted/talented and high ability students who need advanced instruction. Magnet ELP is housed in three elementary schools: Hawthorne, Whittier, and Emerson. The teachers and students in the Magnet programs are part of the Student Support Plan (SSP) and ELP teachers share in planning programs and activities.

Principals at each school work closely with the SLCSD ELP Department in establishing ELP programs according to district guidelines. Each principal of a school housing a Magnet ELP program has the responsibility for the Magnet ELP program and supervises teachers in that program. The principal of each school works closely with the district ELP Supervisor sharing information and determining needs of the Magnet ELP program and teachers.

• Emerson
  o Magnet ELP Dual-Language Immersion (DLI) is a full day program for students in grades 1-6 and is housed at Emerson Elementary School. A few of the features include:
    • Two-way Immersion provides two language groups (English and Spanish) with an opportunity to become bilingual and biliterate.
    • Students learn to read, write and speak both languages.
    • Becoming proficient in both languages is recognized as a significant intellectual and cultural achievement which prepares students to be powerful contributors in our global society.
• Hawthorne
  o ELP at Hawthorne offers unique educational opportunities that are supported by qualified teachers plus a large and cohesive parent organization. Hawthorne’s goal is to promote a lifelong love of learning for intellectually gifted students and to give them the tools they need for effective problem solving, critical thinking, and communication. A few of the features include:
    - Jr. Great Books and College of William and Mary literature;
    - Math Olympiads and Mathcounts competitions;
    - Shakespeare Festival;
    - Conversational Spanish instruction five days a week.

• Whittier
  o Whittier Elementary School is committed to providing an educational program that promotes the social, emotional, and academic growth of our gifted and talented students. Whittier provides rigorous and accelerated academics in an atmosphere that encourages scholarly habits and individual responsibility for learning. A few of the features include:
    ▪ Problem-based learning utilizing depth and complexity;
    ▪ Open and compassionate thinking;
    ▪ Rigorous acceleration of the expanded core, and;
    ▪ Student use of a spectrum of cognitive strategies;
    ▪ Parent involvement and a cohesive supportive community.

Applying for Magnet ELP, rising grades K-6

Identification Procedures
Students are assessed using nationally normed and recognized evaluation measures. Scores are evaluated by the established eligibility criteria. Results are reviewed by the District ELP Eligibility Determination Committee with all names and identifiers removed. The assessment, eligibility, and identification process consider the following information: cognitive ability test scores (verbal, quantitative, and nonverbal), and beginning in grade four, achievement test scores (reading and math). Eligible students are offered appropriate services independent of class sizes.

The custodial parent/guardian receives assessment results and eligibility determination by U.S. mail only; results are not given over the phone. The parent/guardian completes and submits a Letter of School Site Choice.

Eligibility Process
The purpose of assessment is to identify gifted/talented and high ability students for ELP services. Placement in the magnet program is determined by the ELP Department. After students have been found eligible for Magnet ELP, parents are given the opportunity to make a first through third choice of schools; however, this does not guarantee first or second choice of
school placement. School placement is based on several determining factors including balanced class sizes. The ELP Department makes the final school placement decision.

**Magnet Extended Learning Program, Grades 7-8**

*Middle School Magnet ELP*

The Magnet Extended Learning Program (MELP) is a district program in which students are identified by nationally normed assessment measures. Eligibility scores are determined at the district level. Identified students have the option to participate in magnet, neighborhood, or decline either program.

The Middle School Magnet Extended Learning Program, grades 7 and 8, is housed in four schools: Clayton Middle School, Hillside Middle School, Glendale Middle School, and West High School. All students in grades 7 and 8 at West High School have been found eligible for Magnet ELP. The Middle School Magnet program extends learning in four core subject areas.

Students who desire a middle school Magnet placement must assess in grade 6 or grade 7. This includes all students currently in an elementary Magnet ELP placement.

**Applying for Magnet ELP, rising grades 7-8**

*Identification Procedures*

Students are assessed using nationally normed and recognized evaluation measures. Scores are evaluated by the established eligibility criteria. Results are reviewed by the District ELP Eligibility Determination Committee with all names and identifiers removed. The assessment, eligibility, and identification process consider the following information: cognitive ability test scores (verbal, quantitative, and nonverbal) and achievement scores (reading and math). Eligible students are offered appropriate services.

The custodial parent/guardian receives assessment results and eligibility determination by U.S. mail only; results are not given over the phone. The parent/guardian of eligible students complete and submit a *Letter of Intent* for magnet placement by the required date.

*Eligibility Process*

Students in grades six and seven who live outside district boundaries may apply to be assessed for possible Magnet ELP placement. There is an assessment fee of $35 for out-of-district students. The parent/guardian is assessed prior to the scheduled testing date. A parent/guardian of an out-of-district student who qualifies for magnet school placement must provide transportation for their student. Transportation services are not available for out-of-district students.
Neighborhood Extended Learning Program (NELP), grades 4-6

*Elementary Neighborhood ELP*

The Neighborhood Extended Learning Program (NELP) operates in every elementary school in Salt Lake City School District. SLCSD provides a half-time NELP teacher for each school in the district as part of the District’s Standard Education Plan. A full-time teacher works in two schools. Each school’s NELP teacher provides a pull-out program optimally for a minimum of three hours each week per grade level for identified fourth, fifth, and sixth grade students.

NELP teachers collaborate with the principal and general education classroom teachers, assess students for eligibility, participate in monthly professional development, and collaborate with teachers and staff.

The NELP teacher also serves students in the lower grades as a consultant, a push-in teacher, or through fluid Discovery Groups. This service model is planned in collaboration with general education teachers.

NELP teachers have or are currently in the process of completing requirements for the Utah Gifted and Talented Endorsement. They provide an interdisciplinary approach by integrating multiple subjects through thematic instruction. Student learning is extended beyond the general education classroom. Extension can be subject acceleration, pacing, complexity, depth in content and skill development in problem solving, higher order thinking skills and/or critical and creative thinking.

*Eligibility Procedures for rising grades 4-6*

Elementary Neighborhood (NELP) eligibility is determined by a school site-based committee using data from the district-wide universal screening in August/September. Each individual school team, under the direction of the NELP teacher, using the Salt Lake City School District assessment scores, establishes criteria for placement in NELP.

Identified Neighborhood ELP students meet with the NELP teacher in grade level groups optimally for three hours per week and experience curriculum that is an extension of the general education classroom with more depth, complexity and appropriate pacing. Identified NELP students do not need to reassess to maintain their neighborhood placement in elementary school.

NELP teachers collaborate with the principal and general education classroom teachers, assess students for eligibility, participate in monthly professional development, and collaborate with faculty and staff.
Neighborhood Extended Learning Program (NELP), grades 7-8

*Middle School Neighborhood ELP*
The Neighborhood Extended Learning Program (NELP) operates at four middle schools, Clayton, Hillside, Glendale, and Northwest. Neighborhood ELP provides services in two or more core subjects.

*Applying for Neighborhood ELP, rising grades 7-8*

*Identification Procedures*
Middle School Neighborhood ELP (NELP) eligibility is determined by established criteria using data from the identification process in the November assessment window. Most NELP placement is a direct result of this assessment, eligibility, and identification process including, ability test scores (Verbal, Quantitative, and Nonverbal), and achievement test scores (Reading and Math).

*Eligibility Procedures for rising grades 7-8*
Identified Neighborhood ELP students in grade 7 do not need to reassess to maintain their Neighborhood ELP placement for grade 8.

Each middle school team, working with the ELP Supervisor, establishes criteria for student placement in NELP classes at their individual middle school. School personnel determine the number of classes offered and the core subjects for those classes.
Extended Learning Program Continuum of Education Services
The Extended Learning Program provides a continuum of services for gifted/talented and high ability students from kindergarten through grade eight.

Continuum of Education Services

<table>

</tbody>
</table>

- **Collaboration with General Education Teacher**
  - Collaboration with teachers to meet the individual needs of students who are in K-6, but who are not in a MELP or NELP class.

- **Neighborhood Discovery and Pull-out Groups (NELP)**
  - Students in grades K-3 may receive accelerated differentiation through small group activities with a NELP teacher. These groups change throughout the year.

- **Magnet Full Day Classrooms (MELP)**
  - Eligible students receive pullout services to enhance learning that extends beyond concepts taught in the general education classroom.

- **Neighborhood Program (NELP)**
  - Eligible students receive full-day advanced instruction to address academic needs in a self-contained classroom.

- **Magnet Program (MELP)**
  - Eligible students receive advanced instruction in two or more classes.

Identification and Eligibility

Gifted/Talented and high ability students need advanced curriculum and instruction beyond the general education classroom. Students are identified for ELP services using nationally normed measures. Assessments are not administered more than once in a twelve-month period. Parents may choose to have their student assessed each year for possible ELP placement. Identification measures for rising K students are given individually. All assessment measures are nationally normed by age.
District-Wide Universal Assessments for all Students

Pre-Kindergarten (Pre-K-4)
All students enrolled in SLCSD Pre-K-4 are administered the Raven’s 2, online nonverbal cognitive assessment; this assessment is comprised of a series of progressive matrices that involve cognitive functions such as perception and attention to detail, inductive reasoning, classification and spatial ability, simultaneous processing, fluid intelligence, broad visual intelligence, and working memory. No English Language skills are needed to take this assessment. The assessment is administered in February.

The assessment results may also identify students for further assessment that will be used to determine eligibility for Magnet ELP services. The assessment results may also be used to help teachers differentiate in the general education classroom. Assessment results are accessible by school personnel and can be shared with parents through the student’s classroom teacher.

Kindergarten
All students enrolled in a SLCSD kindergarten are administered the Raven’s 2 online nonverbal cognitive assessment that is comprised of a series of progressive matrices that involve cognitive functions such as perception and attention to detail, inductive reasoning, classification and spatial ability, simultaneous processing, fluid intelligence, broad visual intelligence, and working memory. No English Language skills are needed to take this assessment. The assessment is administered February.

The assessment results may also identify students for further assessment that will be used to determine eligibility for ELP services for students who are going into first grade, as well as differentiation in the general education classroom. Assessment results are accessible by school personnel and can be shared with parents through the student’s classroom teacher.

Grade Four
All students enrolled in grade four (and new-to-district students in grades five and six) are administered an online cognitive screening assessment (Nonverbal, Verbal, and Quantitative) at the beginning of the school year. The assessment results provide useful data to the school team in helping to identify students for possible Neighborhood ELP pull-out services, as well as differentiation in the general education classroom. The assessment data closely reflects the demographics of each school.

The assessment results may also identify students for further assessment that will be used to determine eligibility for Magnet ELP services. Assessment results are accessible by school personnel and can be shared with parents at SEP conferences.

The Extended Learning Program has administrators, teachers, and others who are committed to equity for all students in the ELP program. Identifying more diverse students is an ongoing conversation and priority.
Determining Eligibility for Magnet ELP Services
When determining eligibility, the following criteria are taken into consideration:

**Evidence:** (Assessment results) Identifies and supports the student as being academically gifted or talented, or as having the potential for performing at remarkably high levels of accomplishment.

**Equity:** Recognizes the diversity, exceptionalities, and economic and individual differences among students and schools within the Salt Lake City School District.

**Need:** Academic learning would be best supported with advanced gifted/talented and high ability instruction through ELP services.

Student Diversity
Processes for identification, selection, and eligibility are transparent and match the state’s requirements “to develop their high potential and enhance their academic growth; and identify students with outstanding abilities who are capable of high performance in the areas of general intellectual ability, specific academic aptitude, and creative or productive thinking.”

Twice-Exceptional Students
Any student who attends a SLCSD school, grades K-7, may be assessed for placement in an ELP program. Twice-exceptional students are students who are identified under both Special Education and ELP. Twice-exceptional students have been and will be placed in both Magnet and Neighborhood ELP classrooms.

It is important that the Extended Learning Program make assessment available to all student populations, including students who are culturally diverse, speak English as a Second Language, have a Special Education classification, and/or may be economically disadvantaged. Teachers and administrators may identify and recommend students for ELP assessment. Teachers and Administrators will follow the ELP Identification Outreach guidelines.

Identification Outreach
While many students test for ELP eligibility during the assessment windows, some gifted/high ability students may not have tested and will enter school in a general education classroom.

The purpose of Identification Outreach is to find and identify gifted/talented and high ability students who need ELP advanced instruction in a Magnet classroom.

The ELP Department is committed to find and identify students who need placement in the Magnet ELP program. There are procedures in place for identifying these students, which include the following: A classroom teacher or other school faculty member notes probable giftedness, high ability, and/or high achievement in a student. The classroom teacher consults with the school’s principal and the NELP teacher and collects data (i.e., observations, test scores, classroom work, etc.). The NELP teacher makes a formal observation of the student. The data are presented at the school Student Services Committee (SSC) meeting. The classroom teacher, the NELP teacher, the principal, and the district ELP Psychologist are invited to this
meeting. The School Services Committee may then recommend the student for additional comprehensive ELP assessment. The recommendation is sent to the ELP Department. The ELP Department will set a date for formalized assessment after the online application window closes. All information (assessment results, observations, and SSC recommendations) is sent to the district ELP Administrative Review Committee for final eligibility decision and school placement.

**Appeals**

If a student’s assessment scores do not meet eligibility criteria, and is not identified for magnet ELP services, and the parent/guardian believes that this is an inaccurate reflection of their child’s abilities, a request may be made for an Appeal.

The parent/guardian submits the Magnet ELP Parent Appeal Narrative and describes advanced abilities that may not have been captured in the assessments. This form needs to reach the ELP Supervisor no later than ten (10) days from the date on the Student Assessment Profile letter. In addition, the parent may request that the current teacher write a letter of recommendation.

The multidisciplinary Eligibility Review Committee will review the assessment scores and consider the information submitted by the parent and teacher in April. The ELP Supervisor will notify the parent/guardian of the Eligibility Review Committee’s decision; this decision is final.

**Transfers**

**Transfers during the School Year**

Except under extreme conditions, transfer requests for the current school year are not accepted after the end of the second trimester.

Transfer requests will be honored based upon space availability, considering even distribution of students, and best interest of the student.

Students transferring into SLCS from out-of-district or out of state need to contact the ELP office with gifted placement and assessment scores from the previous district/school for possible placement or assessment opportunity.

**Transfers for the next School Year**

Parents may contact the ELP Department at the district office and request a Transfer Request form by the end of February. Once the request form has been completed parents return the form to the ELP Department Administrative Assistant. The parent/guardian will be notified in May for the upcoming school year whether the transfer has been approved or denied.

Placement for Magnet ELP remains accessible until a student completes sixth grade, withdraws, or no longer resides within the boundaries of the Salt Lake City School District. Students in grades K-3 who no longer reside in the Salt Lake City School District boundaries need to
withdraw from ELP, with the exception of children of district employees. Employees do not need to live within the boundaries of the district to take advantage of the K-8 Extended Learning Program.

Students in grades 4-6 who move outside Salt Lake City School District boundaries need to reapply for a Magnet ELP placement. Priority for Magnet placement is given to qualified Salt Lake City School District students. Placement for out-of-district students will be determined in May upon class size space availability (according to district guidelines) and in consideration of not overloading class sizes.

There is a $35 assessment fee for out-of-district students.

A parent/guardian of an out-of-district student who qualifies for magnet school placement must provide transportation for their student. Transportation services are not available for out-of-district students. Transportation is not available for Neighborhood ELP.

Advisory Council
The ELP Advisory Council is a noncommercial, nonsectarian, and non-partisan organization that works with the school district to provide quality education for gifted/talented and high ability students. The council seeks to participate in the Shared Governance decision-making process establishing school policy, recognizing that the legal responsibility to make decisions has been delegated by the people to boards of education. The ELP Advisory Council cooperates with other organizations and agencies concerned with student welfare, whose role is to advise and make recommendations to the department based on capacity and resources. Members of the council meet a minimum of eight times per school year. Serving on the council are two school board members, school administrators, MELP and NELP teachers, and parents.

Gifted Curriculum Model
What is the Integrated Curriculum Model?
The Integrated Curriculum Model (ICM) is an approach to teaching gifted students in a way that is sensitive to their needs. This model places an emphasis on advance content knowledge, relies on higher order thinking skills, and focuses learning on major issues that cross several disciplines. The ICM features three components: Overarching Concepts, Advance Content, and Process-Product.

The Integrated Curriculum Model for Gifted Learners

Overarching Concepts:
Reading, reflections, and discussions allow students the ability to develop ideas, themes, and determine related concepts and ideas among various fields of study.
**Advanced Content:**
This provides gifted students the opportunity to delve deeper into a content area, rather than "skim the top" as may occur in a regular education class. Advanced Content provides opportunities for students to use advanced skills and move through the curriculum in a more rapid pace, or deeper.

**Process-Product:**
In true gifted fashion, this aspect of the ICM allows students to explore a topic and conduct research relevant to their topic or engage in a problem-based learning experience.

<table>

**An example of the Integrated Curriculum Model in action:**

**What makes ICM appropriate for gifted students?**
Developed as a means of further educating students who have the background knowledge, not to be used as a form of remediation
- Emphasizes teaching advanced content that further frame disciplines
- Provides higher order thinking and processing
- Students use terms interchangeably from one field of study to another, (i.e., a student may write about a pioneer and their point of view, rather than simply use the term "point of view" in a language arts class)
- The idea of ICM is to scaffold learning for students in a worldly manner, and allow the students the opportunity to explore deep understanding of content and concepts

**Resources:**
*Content-Based Curriculum for High-Ability Learners, by Joyce Van Tassel-Baska*
*School of Education, William and Mary*
Curriculum and Instruction
ELP teachers choose from the following list of state and district approved materials:

Language Arts
William and Mary Language Arts Units, grades K-8
William and Mary Literature Navigators, grades 1-8
Jacob’s Ladder
Michael Clay Thompson literature, writing, grammar, and vocabulary
Junior Great Books
Primary Education Thinking Skills (PETS)
Wonders extensions for effective advanced comprehension and engagement

Math
William and Mary materials for gifted education
Math Quest Simulation
Math Olympiads Problem Solving
Project M² – Mentoring Young Mathematicians
Project M³ – Mentoring Mathematical Minds
Math Counts
Math Pickle
Math Perplexors
Eureka extensions for effective advanced comprehension and engagement strategies

Science and Social Studies
William and Mary Social Studies and Science Units, grades 4-8
Clarion Science Units, grades K-4
NSTA/NGSS/Genetics Lab
Science and Social Studies extensions for effective advanced comprehension and engagement strategies
Science Olympiads
SLCSD Science and Engineer Fair

Interdisciplinary
Teachers combine two or more academic disciplines into one activity. Students demonstrate interdisciplinary understanding when they integrate modes of thinking and knowledge from two or more disciplines in order to create products, raise questions, solve problems, and offer explanations of the world around them in ways that would not be possible through a single disciplinary means.

• Envision
• Brydseed.com
• PETS
• Project/Problem Based Learning Units
Student Learning Objectives (SLOs)

SLOs guide the instruction of gifted and high ability students in elementary NELP classrooms. The following NELP SLOs are found on the SLCSD website - Critical and Creative Thinking, Research, Persuasive and Argumentative Writing, and Narrative Writing.

Teaching Models and Strategies

- William and Mary Models

  - Elements of Reasoning
  - Reasoning about a Situation or Event
  - Hamburger Model for Persuasive Writing
  - Analyzing Primary Sources
- TABA Model for concept development
- Sandra Kaplan’s Depth and Complexity Icons
- Hess’ DOK (Depth of Knowledge/Bloom’s Taxonomy)
- Higher Order Thinking Skills (HOTS)
- Critical and Creative Thinking
- Questioning
- Scholarly Habits
- Habits of Mind
- Independent Research Projects/PIX/University of Learning
- Backwards Design
- Multiple Intelligences
- Mock Trials
- Socratic Circles
- Six Thinking Hats
- SCAMPER

Competitions

Magnet and Neighborhood ELP teachers may choose a competition or special program for students. Competitions and special programs are not required and should not be a focus for curriculum and instruction. Approved competitions are:

- Future Problem Solving (FPS)
  - Scenario Writing
  - Scenario Performance
  - Community Problem Solving
- Math Olympiads
- Creative Pursuits
- State Debate and Speech Programs
- Utah History Fair
- Science Fair
- Science Olympiads
- SLCSD Science and Engineering Fair
